WHY HIRE ME?

With over 15 years of experience in web development and architecture, I bring a proven ability to build robust, scalable, and user-friendly solutions. I've led projects end-to-end, bridging the gap between business goals and technical execution, and consistently delivering high-performance applications. Whether writing clean code, designing system architecture, or guiding teams, I focus on creating solutions that are efficient, maintainable, and aligned with long-term goals. I bring both technical depth and strategic insight to every project.

WORK HISTORY

Digital Architect (acting) 10/2024 to current

Government of Alberta Edmonton

Typescript React Svelte Angular

- Worked with the design system team to define and implement the architectural vision for digital platforms and services.
- Ensure alignment with organizational goals and user needs.
- Act as the lead developer, overseeing and reviewing code, and tackling the most complex patterns and components.
- Helps solve complex technical challenges and ensures solutions are scalable, robust, and maintainable.

Sr. Software Developer 09/2020 to 10/2024

Government of Alberta Edmonton

Typescript React Svelte Angular Jest Storybook

- Responsible for initiating the creation of the UI team
- Primary developer for the UI Component library for dev teams within the provincial government.
- Designed and developed core services made available to other teams.

Sr. Software Developer 12/2018 to 07/2020

CenturyLink Edmonton

Java Spring Boot AngularJS Python Cypress Docker MongoDB

- Helped to add disaster recovery functionality allowing for system recovery to CenturyLink, AWS or Azure cloud instances.
- Worked on Cloud Application Manager analytics backend and rewrote the testing component to allow for faster and selective testing.

Software Developer *(1 year contract)* 07/2017 to 08/2018

Alberta College of Pharmacists Edmonton

Elm Node.js AngularJS ServiceNow MSSQL

- Identified and fixed application usability and security deficiencies.
- Created UI designs for next version of the application.
- Developed Elm application to export ServiceNow data to Quickbooks .iif format.
- Implemented data migration CLI that optimized existing migration times to ServiceNow from over 5 hours to a few minutes.
- Created Elm application to convert old quickbook data type to csv files

Software Developer *(1 month contract)* 07/2017 to 08/2017

Ledcor Edmonton

AngularJS Gulp

- Created a deployment system that decreased deployment time from 10 minutes to a few seconds.
- Reduced total application size by ~90%.

Sr. Software Developer 04/2014 to 05/2016

Showbie Edmonton

Ember JS Go

- Developed web application replicating the existing iOS application for the web.
- Created web application which allowed school districts to manage teacher licenses.
- Built Go utility to convert .po files supplied by the translating service to the custom locale format required for Android, web and iOS.

Software Developer | Architect 2011 to 2012

Mitremedia Edmonton

Ruby on Rails Nginx MySql PHP

- Optimized web applications created by bought-out companies (reduced response times from > 2min to less than 5 seconds).
- Server and deployment setup for existing applications.

Android Developer | Architect 2010 to 2011

Drivewyze Edmonton

Java Android Sqlite3

- Promoted to Architect after less than a year.
- Designed and developed Android application allowing semi drivers to receive bypass notifications from weigh stations.
- Responsible for creating and documenting logic for mobile devices and backend API.
- UI design for all mobile platforms

Full-stack Developer 2010

Minigroup Calgary

Ruby on Rails jQuery MySql

- Worked on the backend server logic and frontend jQuery
- Created search module to allow users to find notes, links and/or assets

Web Developer *(contract)* 2008 to 2010

Zedi Edmonton

jQuery ASP.NET Oracle

- Successfully completed a scalability project which gave the site the ability to handle increased user load.
- Completed the SCADA drag n’ drop interface that provided users that ability to monitor various on-site sensors.

System Analyst II 2005-2007

Alberta Education Edmonton

ASP.NET VB.NET MSSQL

- Created web application that allowed special requests to be made and processed online.

Software Developer *(4 month internship)* 2005

Alberta Education Edmonton

VB.NET Win32 MSSQL

- Developed in-house application that allowed flagged exams with scan errors and allowed them to be corrected online instead of manually.
- Increased the speed of the process scan errors more than 100 times.

PERSONAL PROJECTS

Woddy
: Workout of the day app tracker. *Elm, Go, AppEngine*

MathOps
: Allows kids to practice their basic math skills and track their progress over time. *Android*

LeagueSmart
: Created game schedules and provided score/stat entry. *RubyOnRails, MySql*

Onlinelisting
: Allowed real-estate agents to create personal sites. *RubyOnRails, MySql*

EDUCATION

- Udacity Intro to Self Driving Cars
- Udacity Android Developer Nanodegree
- Northern Alberta Institute of Technology
